## INDOOR AIR QUALITY

### Patented PHI-Cell® Technology

Photohydroionization® or PHI is a patented Indoor Air Quality (IAQ) technology for installation in various HVAC systems. As used in multiple products, RGF®'s PHI-CELL® creates airborne gaseous hydrogen peroxide for distribution throughout your living and working spaces, reducing viruses, bacteria, mold spores and odors at the source. As Mother Nature's chosen sanitizer, hydrogen peroxide is incredibly effective at reducing these contaminants in your home or office, just as it is outside.

REME ZERO REME HALO  
9" 24V  
**\$378.68**

REME-H REME HALO
